

In India, peak earning hours for delivery partners (Zomato, Swiggy, Zepto, Blinkit) are strictly tied to specific "slots" or "gigs" where platforms offer the highest base pay and additional incentives.

1. Primary Peak Earning Slots

Earnings are generally 1.5x to 2x higher during these windows due to high order volume and **Peak Hour Incentives (PHI)**.

Slot	Time Window	Key Characteristics
Lunch Peak	**12:00 PM - 3:30 PM**	High demand from offices and students. Strong order density in business hubs.
Dinner Peak	**7:00 PM - 11:30 PM**	The **most lucrative** slot. Maximum "surge" pay and milestone bonuses.
Snacks Peak	**4:30 PM - 6:30 PM**	Growing demand for tea, coffee, and quick-commerce groceries (Blinkit/Zepto).
Late Night	**11:00 PM - 3:00 AM**	High per-order payout (often ₹20-₹40 extra "Night Surge") but lower order frequency.

2. Platform-Specific Incentive Structures

To maximize earnings, delivery partners typically target "Milestone Incentives" (Slabs) within these slots:

- * **Zomato (Gigs System):** Partners must "book" specific gigs (e.g., 7 PM - 12 AM). Completing a set number of orders (e.g., 15 orders in 5 hours) can trigger a bonus of **₹400-₹600** on top of the base pay.

- * **Swiggy (Slot System):** Similar to Zomato, Swiggy offers "Minimum Guarantee" (MG) pay if you stay logged in for the full peak slot and complete a minimum number of orders.

- * **Quick Commerce (Zepto/Blinkit):** Peak hours are often **7 AM - 11 AM** (breakfast/grocery) and **6 PM - 10 PM**. These platforms offer higher "Weekly Slabs" (e.g., **₹2,000** bonus for 250 orders a week).

3. How to Maximize Earnings

- * **Rain/Festival Surges:** During heavy rain or major festivals (Diwali, New Year's Eve), per-order payouts can spike from the usual **₹20-₹40** to **₹120-₹150**.

- * **Multi-Apping:** Many workers log into both Swiggy and Zomato, but platforms now use "forced login" or "gig booking" to prevent this during peak hours.

- * **Location Strategy:** Positioning yourself near "Cloud Kitchen" hubs or high-density restaurant areas (like Indiranagar in Bengaluru or Hitech City in Hyderabad) during the **7 PM - 9 PM** rush is critical.

4. Estimated Earnings (Metros)

- * **Full-Time (10-12 hours):** Gross **₹25,000 - ₹35,000** per month.

- * **Part-Time (Peak Hours only):** Gross **₹12,000 - ₹18,000** per month.

- * **Note:** Net earnings are typically 20-30% lower after accounting for fuel, vehicle maintenance, and smartphone data. **Show Less**
